- Great Course!
- Well organized
- I absolutely loved taking this course and especially with Dr. Danilo! He was always so enthusiastic and quick with emails that had really kind words. I also loved the use of GitHub to teach Python which really forced me to learn how to use GitHub for once, not to mention the slides were just also really cool how it was coded. Lastly, I thought the online format for this class was brilliant since it was so much easier to share screen and see his code too.

- Have a great summer!
- Really great professor. When ever have questions, just ask him. He will be really nice and patient to answer the question.
- Please have Dr. Danilo teach more courses if not computing courses. He is a breath of fresh air if you're feeling burnt out and can really help remind students of why data science is awesome and fun. All of his classes were really engaging, and I really appreciated how open and encouraging he was to us when we had questions. I completely understand why all of his courses are filled up and really wishes him the best.

* Parking when I went on campus cause I swapped parking deck and sometimes the gate let me in and others, I had to dial a phone number and entered a code to be able to do that. Before, I just had problems with the summer bus schedule that was very inconsistent with their arrival and departure times.
